FRONTEND DEVELOPER

COMPANY

Simply Jet is an on-demand private jet charter brokerage company based in Lausanne, Switzerland. We are currently growing and have several job openings over the next months.

YOUR ROLE

Your job will be to work on designing, developing and/or reengineering complex application components, as well as integrating software packages, programs and reusable objects residing on multiple platforms.

YOUR RESPONSIBILITIES

- Be responsible for the maintenance and improvement of our critical internal applications.
- Perform application development based on Agile methodologies & participate in requirements/user story analysis, design, and execution.
- Conduct appropriate unit and module testing; detect, report, investigate and fix defects in the application (production support).
- Continually focus on improving the application.
- Work effectively in collaboration with other team members, partners, and other support functions when required
- Experience with design thinking methods to understand personas and develop great user design.
- Demonstrated ability to operate within short release cycles.
- Experience using modern collaboration tools in a highly responsive environment.
- Great planning and organizational skills, good time management, with the ability to manage and prioritize own workload and to deal with urgent deadlines and changes to requirements.
- Close Teamwork and Collaboration across both global and local team environments.
- The ability to communicate across organizational boundaries and manage stakeholders
- A passion for creative solutions to real user needs and business problems
- Driven to achieve high levels of customer satisfaction, addressing the underlying problem, and questioning any assumptions, a Logical approach to problem-solving & meticulous attention to detail.

PLACE OF WORK

The position is based in Gurugram, India.
